
Carriers for all seasons...

In arctic snow, in tropical swamp, in marsh land or in the desert, on road or off road, Bombardier's logistic vehicles will make it.

...and for specific needs

When it comes to transporting cargo and personnel, Bombardier's tracked or wheeled carriers can fulfil the logistic requirements of a modern army. And thanks to Bombardier's engineering know-how and flexibility, they can be adapted to suit the particular needs and specifications of the user.

The Bombardier carriers

2½-ton truck

This Canadian version of the M-35 is equipped with an 8-cylinder diesel engine, automatic transmission, power steering and noise reduction kit.

½-ton utility vehicle

The Iltis offers state-of-the-art technology while strictly adhering to military specifications for off-road performance. It can be equipped with a gasoline or diesel engine.

Military motorcycle

Mainly used in communications, police and reconnaissance missions, this motorcycle is available with 2-cycle or 4-cycle single-cylinder engine.

Over snow light track carrier

Based on Bombardier's original track technology, this vehicle takes cargo and personnel swiftly and safely into otherwise inaccessible areas.

Alpine carrier

This military version of Bombardier's twin track utility vehicle gives additional mobility in arctic conditions.
